

# Upper Onny Wildlife Group

## Lapwing 2014

### Population and Distribution

The pair in SO39U were found on 11 May, but not seen there during the surveys. They may have relocated from SO39Y, or elsewhere. Total 18 – 19 pairs (plus 2 outside area)

One of the pairs in SO39K fledged four young, and a post-breeding flock of 13 in SO39Z included several fledged young
