

COMMUNITY WILDLIFE PLANT GROUPS

With the funding from the Stiperstones Corndon Landscape Partnership Scheme it is hoped to have plant groups as part of the Rea Valley and the Camlad Valley Community Wildlife Groups.

This has worked well in other groups, especially in the Clun and the Upper Onny. Initially our main focus would be on helping to locate and survey the existing old hay meadows, pastures and road verges to compliment the work of the Landscape Partnership Scheme.

There are other possibilities such as surveying ancient trees, fungi and other plant habitats It is really down to YOU, the people living in the area to say what you may be interested in doing.

The Upper Onny Plant Group already has a varied programme for this year to which you are welcome and some of the events are within these new areas. Also the Shropshire Wildlife Trust will be doing botanical surveys of local Wildlife Sites.

There will be a follow up Plant Group meeting fairly soon so that those people who are interested can get together.

We will produce a programme to cater for a range of ages and abilities. Don't be put off if you think you don't know much about plants, as training will be provided; and if you have skills do please come and share them.
