

## **Health and Safety Statement**

Abdon District Community Wildlife Group takes health and safety very seriously. Through careful risk assessment and planning we aim to ensure our activities are as safe as possible. All members of the group have a responsibility for their own safety and that of others and are expected to take reasonable care of themselves and those around them.

If you have any concerns regarding health and safety issues at any time please raise them with either the member leading the group activity or a member of the committee. These will be taken seriously and investigated promptly.
