

Upper Onny Wildlife Group Cuckoo Records 2025

(All surveys and Casual records)

Each dot represents a calling (male) seen or heard on one of the surveys. Breeding territories are large, so some dots will be the same bird.

- First survey (up to 6 April)
- Second survey (up to 4 May)
- Third survey (up to 22 June)

Casual records (birds seen or heard, but not during a survey) are shown as hatched dots in the appropriate period colour.

**Population estimate: at least 7 territorial males,
compared with 7 in 2024, 5-7 in 2023, and 5 in 2022**
